

Project Demo Planning

Date	10 JULY 2026
Team ID	XXXXXX
Project Name	Rising Waters – Flood Prediction ML Model
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Problem statement and objectives	2 min	Harika
2	Dataset & Methodology	Dataset, preprocessing, algorithms	3 min	Harika
3	Model Demonstration	Live prediction using trained model	4 min	Harika
4	Results	Accuracy and model comparison	2 min	Harika
5	Future Scope	Enhancements and deployment	1 min	Harika
6	Q&A	Answer judges' questions	3 min	Harika

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce the team, explain the increasing risk of floods, project objectives, and the motivation behind developing an AI-based flood prediction system.
2	Solution Overview	Explain the dataset used, preprocessing steps, machine learning algorithms (Decision Tree, Random Forest, KNN, XGBoost), and why the best-performing model was selected.
3	Live Feature Demonstration	Demonstrate the application by entering sample weather parameters, generating flood risk predictions, displaying results, and explaining model performance metrics.
4	Q&A Session	Answer judges' questions, discuss limitations, future enhancements (real-time weather API, GIS integration, mobile app), and conclude the presentation.
